

The purpose and goals for having the bi-monthly Outreach and Intervention Program sessions are;

To provide as many services that are available to persons with Substance Use Disorders (SUDs) and/or friends and family members of persons with SUD(s) on a regular basis at one, centralized location.

Far too often people suffering from addiction or their family members learn about help resources too late or after a problem has gone too far.

This program is designed to proactively provide resources on a regular basis.
